The right jigsaw for everyone!

The Compact Generation of Bosch jigsaws is handier, lighter and more precise. Whether you are a creative occasional do-it-yourselfer, a proficient do-it-yourselfer or an expert: the tools in the Compact Generation are always the right choice, and they are tailored to precisely meet your personal needs. Make your choice!

The advantages of the Compact Generation jigsaws from Bosch:

- Optimum handling due to **compact design** and **low weight**
- Precision for every job – with **Bosch Electronic**
- Minimal vibration due to **Bosch Low Vibration** and **ergonomic softgrip**
- Quick and easy saw blade changes due to **Bosch SDS system**
- Optimum precision and control – accurate tracking of the cutting line due to the innovative **CutControl** (also optionally available as an accessory)

Compact Generation

Easy Universal Expert

The Compact Generation is also available for PSB impact drills

Compact precision for everyone.

Precise sawing is really easy, as long as you have the right jigsaw. The Compact Generation enables you to saw tight curves and wavy lines more precisely than ever before. It also offers minimal vibration, exact line tracking, and easy fingertip control of the power.

All of the tools in the Compact Generation are ergonomically designed. They are compact, lightweight and always sit securely in your hand. Their impressive features include, for example, the cable guide with hanging hook and the robust carrying cases with practical layout. Enjoy working with them!

Low Vibration

Precision and vibration don't mix, which is why the Bosch jigsaws are equipped with "Low Vibration", a linear mass balance, and ergonomic softgrip. This ensures that vibration generated by the linear motion of the saw blade is absorbed in the best possible way.

With its Compact Generation, Bosch has succeeded in combining innovative technology with a compact design. The result is a generation of tools that unites precision and ergonomics.

CutControl helps you to cut precisely along the marked cutting line (also optionally available as an accessory).

You can control the sawing speed using the **Bosch Electronic** system and the **accelerator switch**.

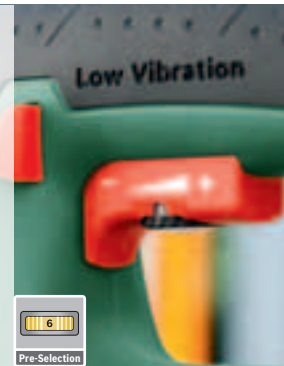

The additional **stroke rate preselection** sets your jigsaw to suit the material you are working on before you start (PST 900 PEL).

CutControl

Bosch Electronic

Bosch Electronic with stroke rate preselection

Bosch two-hand SDS

Bosch one-hand SDS

4-stage pendulum action

Bosch two-hand SDS ensures effortless and safe saw blade changes within seconds – without the need for additional tools.

This is done even faster with **Bosch one-hand SDS**: simply insert the saw blade and press a button to eject it (PST 900 PEL).

The **4-stage pendulum action** ensures faster sawing progress and a longer lifetime of the saw blade by quickly removing the sawing chips.

Always the right choice – the Bosch Compact Generation.

Compact Generation

Easy

Universal

Expert

The **Easy jigsaw** from Bosch enables precise and easy working. Particularly when sawing curves.

As easy as can be.

Do you simply want to perform smaller sawing projects like decoration and profile work, and also make precise straight and curved cuts? Then the **Easy jigsaws** from Bosch are exactly the right tools for you. It is precise, handy and lightweight for the best sawing results.

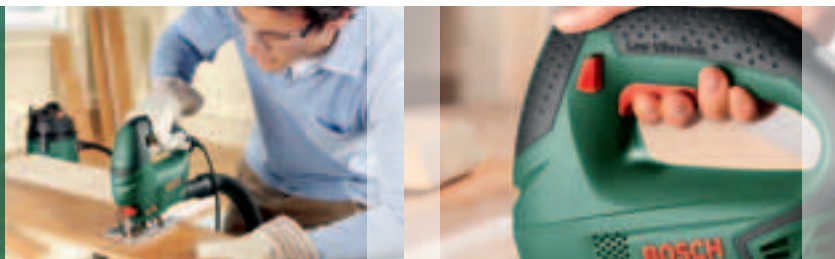

PST 650 and PST 700 E: Easy Rider – for precise curves and straight lines.

- **Compact design**, low weight and outstanding handling ensure perfect control and optimum **user comfort**
- Precision due to **Bosch Electronic** (PST 700 E): **stroke rate control** for an easy sawing start and material-specific working
- Minimal vibration for safe and comfortable working due to **Bosch Low Vibration** and **ergonomic softgrip**
- **Bosch SDS** for effortless and safe saw blade changes within seconds – without the need for additional tools
- A clear view of the cutting line thanks to the on/off **dust blowing function**

Ideal for projects up to 70 mm cutting depth such as:

- Sawing wooden floors, panels / boards to size
- Creating your own decorations and toys (e.g. coat racks, rocking horses, picture frames, etc.)

Always the right choice – the Bosch Compact Generation.

Compact Generation

Easy

Universal

Expert

The **Universal jigsaw** from Bosch provides reliable performance for universal use.

Endless possibilities. One machine.

Are you planning larger projects and want to quickly make precise straight and curved cuts? Then the **Universal jigsaw** from Bosch is exactly the right tool for you. Always on a precision course – for universal use.

PST 800 PEL: On a precision course – along the line with CutControl.

- **Compact design**, low weight and outstanding handling ensure perfect control and optimum **user comfort**
- Optimum precision and control – the innovative **CutControl** enables you to easily and accurately track the cutting line
- Precision due to **Bosch Electronic: stroke rate control** for an easy sawing start and material-specific working
- **4-stage pendulum action** for faster sawing progress and a longer lifetime of the saw blade
- Minimal vibration for safe and comfortable working due to **Bosch Low Vibration** and **ergonomic softgrip**
- **Bosch SDS** for effortless and safe saw blade changes within seconds – without the need for additional tools
- **On/off dust blowing function** for a clear view of the cutting line

Ideal for projects up to 80 mm cutting depth such as:

- Sawing wooden floors, panels / boards to size
- Creating your own decorations and toys
- + Wall/ceiling panels, plastic pipes, aluminium profiles
- + Adjusting, correcting and fitting materials

Always the right choice – the Bosch Compact Generation.

Compact Generation

Expert

The **Expert jigsaw** from Bosch is a robust and powerful tool for demanding projects.

For do-it-yourselfers with the highest demands.

Do your complex renovation projects set the highest requirements with regard to precision and power? Then the **Expert jigsaw** from Bosch is exactly the right tool for you. For straight, curved and mitre cuts with maximum precision.

PST 900 PEL: **With maximum precision through all materials.**

- **Compact design**, low weight and outstanding handling ensure perfect control and optimum **user comfort**
- Maximum precision and control – with **CutControl** and integrated **PowerLight**
- Maximum precision due to **Bosch Electronic**: with **stroke rate preselection** and **control** using a setting wheel and a trigger switch
- **4-stage pendulum action** for faster sawing progress and better sawing of curves
- Minimal vibration due to **Bosch Low Vibration** and **ergonomic softgrip**
- **Bosch one-hand SDS** for the easiest and safe saw blade changes within seconds – without the need for additional tools

Ideal for projects up to 90 mm cutting depth such as:

- Sawing wooden floors, panels / boards to size
- Creating your own decorations and toys
- Wall/ceiling panels, plastic pipes, aluminium profiles
- Adjusting, correcting and fitting materials
- Furniture construction
- Sawing kitchen worktops, large plastic pipes, thin and thick sheet metals to size
- Drywall work

Every model is equipped with the new, robust Compact carrying case

The ideal addition to your green Bosch jigsaw – Saw Station PLS 300

The mobile saw station helps you to make straight cuts quickly and safely in laminate, parquet, plastics and aluminium. Simply place the workpiece on the station, close the aluminium guide – then saw in perfect straight lines. This practical saw station has a guide channel which makes even horizontal angle cuts up to $\pm 45^\circ$ and vertical mitre cuts incredibly easy. Set up, adjust and start sawing!

The best saw blades for your projects.
