Extended retailer text	<p>Secure your garden, driveway or other outdoor space with this advanced 360° wifi security camera. With 360° visibility, automatic tracking and human detection technology, you won't miss a single unwanted visitor. Receive instant push notifications in the app when there is movement or noise, and</p>
-------------------------------	--

enjoy razor-sharp images both day and night.

360° visibility

With this smart camera, you won't miss a single visitor thanks to its advanced pan and tilt function. The camera can rotate and tilt, giving you a full view of your surroundings. It is even possible to track moving objects automatically. All this is done in razor-sharp image with a resolution of 3MP.

24/7 razor-sharp images

The Wi-Fi camera offers sharp images, even in the dark. The night vision mode automatically switches on when the light level drops, giving you clear visibility even in the evening and at night.

Prevent false alarms thanks to human detection

Thanks to the Human Detection function, this camera recognises people, minimising false alarms caused by, for example, husky animals walking by or blowing branches. So you only receive notifications when it is really necessary.

Instantly informed with push notifications

Thanks to push notifications, you are always immediately aware of what is happening around your home. As soon as the camera detects movement or sound, you receive an instant notification on your smartphone. This allows you to see what is going on in the app and - if necessary - take action.

Works with the free Trust WIFI app

Control and monitor your camera very easily with the free Trust WiFi app. Whether you want to watch live view, review recordings or use the camera microphone: you can do it all via your smartphone or tablet, without expensive subscription fees

Built-in light and siren for optimal security

The 360° outdoor camera is equipped with a built-in lamp and siren that (if desired) turn on automatically in case of motion or sound detection. These functions can also be controlled manually via the app. So you are optimally protected against intruders.

Specifications

Total weight	450 g
Weight of main unit	284 g
Height of main product (in mm)	99 mm

Width of main product (in mm) 81 mm

Depth of main product (in mm) 118 mm

Sensor type motion

Sensor resolution 2304x1296

Microphone Yes

Detection grid Yes

Lens angle 93,6 degrees

Night vision Yes

Night vision range 8 m

Talk back Yes

Face recognition No
